

## Detailed Report

**Activity- "Clothes Distribution"**

**Scheme- Social Awareness & Welfare**

**Organized by- Eshan Club**

Every soul needs a comfortable place to stay and comfortable clothes to keep up according to the weather. Especially during a cold winter night, everyone would look for something comforting to keep themselves warm and safe. However, it is hard for some people who can barely afford anything to get a comfortable stay during the night. In our daily lives, we come across hundreds of homeless people in the streets of Delhi. It's entirely hard to even imagine how someone without a shelter fights the cold winter. The biting cold of Delhi makes it hard for anyone to survive without proper shelter and care, and mostly it makes a person fall sick easily. Eshan Club initiated a program called "**Clothes Distribution**" on 30/12/2021. It was a campaign to help those who are in need, to bring warmth by donating and distributing clothes to many homeless people.

During this campaign, 69 students managed to collect clothes like jackets, sweaters, bed sheets, blankets, shawls, scarfs, etc. After the collection, the team moved out to distribute the collected clothes to the needy. There was overwhelming response from Teaching, Non – Teaching staff and students in the campus. Volunteers took sincere efforts in collecting all the clothes and segregated them as per age groups. The event started around 8 AM where the team began their distribution from one footpath to another. There were many homeless people and most of them were families. There were even small kids trying to adjust themselves in the cold weather with the thin and small layer of clothes which they had.

When the team distributed the clothes to them, the people were overjoyed. Being able to provide them the little things for their comfort during this winter is what Eshan Club as a team thrive for. Through this campaign, the team understood how these homeless people manage to survive throughout the cold winter. This initiative brought comfort, warmth, sound sleep, and happiness in people's hearts. It is also an accomplishment to cherish forever. On the whole, the drive was very fruitful. As a result, they appeared very much positive and supportive about the programme when they witnessed sympathy and painstaking efforts. Our Dean Academics also thanked and appreciated all the volunteers and Programme officer for taking the initiative in these regards.
