

## Detailed Report

**Activity- “Energy Conservation Awareness Program”**

**Scheme- Energy Conservation (Sustainable Environment)**

**Organized by- Electrical Engineering Department**

Climate change and sustainability are linked to endeavours of the Bureau of Energy Efficiency (BEE) to make people aware of their responsibilities towards building a sustainable life. As part of its mandate to promote energy efficiency and conservation, many institutes have taken energy awareness campaign to inculcate the habit of conservation and sustainability. The objective is to enhance awareness level amongst the public on energy efficiency and inform them about the virtues of adopting energy conservation. People are also made aware of the quality and standard issues of energy intensive appliances. With a similar objective, “**Energy Conservation Awareness Program on World Environment Day**” was organized by Electrical Engineering Department of Eshan Engineering College on 05/06/2021.

The objective was to create awareness among the general public and equip them for efficient management of all forms of energy, to promote energy efficiency and energy conservation and to develop new sources of energy as well as novel energy technologies with a view to increasing the production and facilitating the use of energy on a sustainable basis. It aims at seeking the student efforts to convene, catalyse and facilitate works in the energy conservation related activities in a participatory mode. ACTIVITIES

This program, in general, focussed on enhancing environmental awareness and fostering critical thinking and problem- solving approaches among 123 participants, by helping them to become actively involved in the exploration of their immediate environment through understanding certain concepts and undertaking some selected activities related to energy conservation and energy efficiency. The students were briefed about basic rules to be followed towards power conservation and electrical safety.
